

ITAL BIOGRAPHY

Ital, musician of chilean origin, sound engineer, label manager of Antu Records Chile, producer of Psytrance music and dj, has been in contact for more than 19 years with the musical world, starting his carrier like a guitar player, going through several styles of popular music, until he arrived to his true passion: Psychedelic trance music.

He started the year 2001 with his friend Andrés Rodillo with who he got involved into the production of Psytrance electronic music, forming one of the pioneering projects of the local scene: “**Metatron**”. In the beginning, experimenting with samplers, synthetizers and audio softwares allowed them to introduce themselves in the national electronic scene, playing live and with great success in different places of the country.

Three years later, in 2004, he decided to create his own project, “**Ital**”, that in Patois african dialect it means purity, and which he uses to promote himself in different scenes around Europe, Asia, Africa, Oceania and America.

Because of this, each production of Ital has like fundamental concept the expansion of all the purity that surrounds us, canalizing through music all this divine and universal energy that surrounds us to be given and projected like sound waves towards our surrounding universe.

His style is characterized for being a Groovy Psytrance with a very own character and style, full of atmospheres, much groove and psychedelia.

Since september 2007 he created and began the first psytrance chilean label denominate: “ **Antu Records** ” which name comes from the indigenous Chilean language that means sun. The purpose and intention is to expand the light and divine energy all over the world through the psytrance music, to connect our selves with our roots and fill our hearts of spiritual healing.

With 15 years of musical experience and experimentation in psytrance, Ital has been presented in the most important events of his country (Chile), and also in some of the great recognized Festivals world-wide like:
